

PREPARED FOR THE PROFILE AND SALES MANAGER

ANIMATED VIDEO SERVICES

Client pitch pack for Upwork, Fiverr and LinkedIn

This pack has everything you need to sell my animation services: the niche names, keywords for gigs and profiles, sample frames, short client hooks, and prices.

We offer three styles. Stickman POV animation comes as Shorts or long-form YouTube videos, and there are also low-poly 3D what-if Shorts. All three are produced with our own in-house animation pipeline: the script, voiceover, every scene, captions, music and sound effects. That keeps them fast and affordable. On top of that, we offer a premium Blender service for clients who want the cinematic, viral 3D Shorts look.

Every project follows the same steps. The client approves the script, then sees sample frames (a storyboard) before the full render. This keeps revisions low, so tell clients about it.

102% RETENTION

"Gravity Got Fired", a low-poly 3D what-if Short from my own channel. Viewers watched it to the end and replayed it.

8:45 LONG-FORM POV STORY

"POV: You're a Dictator's Personal Bodyguard", a full stickman POV story in 4 sections with music, SFX, a thumbnail and a Premiere timeline.

OWN CHANNELS IN THIS FORMAT

Doodle POV, our English stickman POV story channel.
We make this content for ourselves, not just for clients.

ENGLISH + URDU

Professional AI narration in English (deep American narrator) and Urdu. Other languages are available on request.

JAHANZEB ASLAM

HOW EVERY PROJECT WORKS (TELL CLIENTS THIS)

1. BRIEF

The client sends a topic or script, the target platform, length, language and 1–2 reference videos.

2. SCRIPT

We write or polish the script (hook, escalation, twist), and the client approves it.

3. VOICE

AI narrator (English or Urdu) or the client's own voiceover. The client approves a sample.

4. FRAMES

We send a storyboard of real frames before the full render, so fixes are cheap here.

5. RENDER

Full animation, captions, music and SFX, loudness-matched for YouTube and TikTok.

6. DELIVER

MP4 (1080×1920 or 1920×1080), plus a thumbnail and project files if they were in the package.

WHERE TO SEND LEADS

When a client is interested, send Jahanzeb these details so he can confirm the price and date:

- Topic or finished script (we can write it)
- Platform and length (Shorts, TikTok, Reels or long-form YouTube)
- Language and voice preference (or their own voiceover file)
- 1–2 reference videos they like
- Brand colours, logo or mascot (if any)
- Deadline and how many videos per month

01 STICKMAN POV ANIMATED SHORTS

Hand-drawn stickman “POV” Shorts for TikTok, YouTube Shorts and Reels (9:16, 30–90 s)

Real frames from our stickman Shorts pipeline (1080×1920), shown with captions on.

Vertical 30–90 second Shorts in a hand-drawn stickman style. They have rough “boiling” black outlines, flat muted colours and big expressive anime-style heads. Bold text pops in, along with red rubber stamps (FIRED, APPROVED, NO WAY BACK), speech bubbles, film grain and slow camera push-ins. Each one has a deep narrator voiceover, word-timed captions, a music bed and a sound effect on every action. Stories are told as “POV: You...” so the viewer is the main character, which is why people watch to the end. This is ideal for faceless channels that need a steady supply of Shorts.

CLIENT HOOK: FIRST MESSAGE / GIG INTRO

Faceless channel stuck at low views? I make hand-drawn stickman “POV” Shorts that people watch to the end. You get the script, voiceover, captions, music and SFX, all done for you. A Short costs \$35–45 per minute and arrives in 48 hours. Want a free sample frame of your first scene?

LONGER PROPOSAL / DM TEMPLATE

Hi [Name], I saw your channel [channel]. Your topics would work really well as stickman “POV: You...” Shorts, because putting the viewer in the story keeps retention high. I make these end-to-end: script polish, a deep narrator voiceover, animated scenes, word-timed captions, music and sound effects. You approve sample frames before the full render, so there are no surprises. If you send me one topic, I'll make a free sample frame so you can see the style on your own idea.

02 LONG-FORM STICKMAN POV ANIMATED VIDEOS

Long-form 16:9 YouTube story videos (5–12 min) in the hand-drawn stickman style, plus Shorts cut-downs

From our long-form video “POV: You’re a Dictator’s Personal Bodyguard”: the thumbnail and four scenes (banquet, freeze frame, rule card, TV news).

Full YouTube POV videos told from the viewer’s point of view in the present tense (“You step forward.”), the format used by big story-animation channels. A cold-open hook drops the viewer into the most dangerous moment. Then a “3 years earlier...” rewind tells the story in order, with a twist and an ironic ending. The visuals use the same rough stickman style with mood-based colour palettes, maps, documents, stamps, freeze frames, rewind effects, counters and title cards. The music and Foley are cut to every beat. The client gets the video in sections, a thumbnail, and an optional Premiere Pro timeline file.

CLIENT HOOK: FIRST MESSAGE / GIG INTRO

I turn your script into an 8-minute “POV: You’re...” animated story video in the hand-drawn stickman style that big story channels use, for \$30 per minute (\$240 for 8 minutes). You get full scenes, voiceover, music, SFX and a thumbnail in 5–10 days. Your channel gets a consistent weekly look without hiring an animation team.

LONGER PROPOSAL / DM TEMPLATE

Hi [Name], I produce long-form POV animated story videos (“POV: You’re a...”) end to end. I can write the script with a cold-open hook, a rewind and a twist ending, voice it, animate every scene and cut music and sound effects to each beat. You review it section by section. You also see frames before anything is fully rendered. I just finished an 8:45 video this way, “POV: You’re a Dictator’s Personal Bodyguard”, and can share it. Are you looking for one video, or a weekly upload partner?

03 3D LOW-POLY “WHAT IF” STORY SHORTS

Funny 3D animated what-if Shorts with talking planets, objects and characters (9:16, 20–60 s)

Real frames from our low-poly 3D Shorts pipeline (1080×1920). Captions are off here.

Viral-style vertical 3D Shorts built around an absurd “what if” premise. A natural thing becomes a person with a job or feelings: gravity gets fired, the moon goes on strike, the Earth gets dizzy. The look is flat-shaded, low-poly 3D with soft shadows, warm colours and painterly skies. A recurring cast of characters makes it feel like a series. Every Short opens on action in frame 1, escalates line by line, includes one real science fact so people share it, and ends on a loop or a twist. Each one comes with a deadpan narrator, bold word-by-word captions, a music bed and SFX on every gag. Our best one so far reached 102% retention (viewers watched to the end and replayed it).

CLIENT HOOK: FIRST MESSAGE / GIG INTRO

“What if the moon went on strike?” That kind of 3D Short reached 102% retention on my own channel, so viewers watched it to the end and replayed it. I make low-poly 3D what-if Shorts end to end, from script and narration to animation, captions and sound. \$50 per Short, delivered in 3 days.

LONGER PROPOSAL / DM TEMPLATE

Hi [Name], your audience would love a 3D “what if” series built on your topics. I make low-poly animated Shorts where everyday things come alive (planets, clouds, objects, even your mascot). Every one has a hook in the first frame, escalating gags, one real fact and a loop ending that drives rewatches. One of mine reached 102% retention. Should I pitch you 3 episode ideas for your channel?

04 PREMIUM 3D BLENDER SHORTS (ZACK D. FILMS STYLE)

Cinematic, custom-built Blender scenes and characters for viral 3D Shorts (9:16, 20–60 s)

SAMPLE RENDERS

Blender sample renders: ask Jahanzeb for the latest portfolio clips before pitching this tier.

This is our top tier. Every Short is a one-off mini film made in Blender, with custom-modelled sets and characters, cinematic lighting, detailed textures and character animation. It is the polished 3D look of the biggest viral Shorts channels: “how it works” and “what happens if” stories, body and medical explainers, satisfying physics and dramatic mini-stories. These take far more hours per second than our in-house pipelines, so they are priced as premium. We still deliver the full package: script, narration, captions, music and sound design.

CLIENT HOOK: FIRST MESSAGE / GIG INTRO

Want the cinematic 3D look of the biggest viral Shorts channels? We build custom Blender scenes and characters, so every Short is a one-off mini film, with script, narration, captions and sound included. \$100–200 per Short, delivered in 5–10 days.

LONGER PROPOSAL / DM TEMPLATE

Hi [Name], we produce premium 3D Shorts in Blender in the style of the top viral science and “what happens if” channels. Custom sets, characters and cinematic lighting, with script, narration and sound design included. If you want to test it, we can start with one Short and then move to a monthly series. What topic would you like to see first?

Naming tip: “Zack D. Films” is a real creator's name. Use it only as a search keyword in descriptions or proposals (“in the style of...”). Never put it in gig titles, tags or thumbnails, and never copy their characters. Fiverr and Upwork can flag other people's names in titles.

RULES FOR TAKING JOBS

- No copyrighted characters or logos (no Disney, Marvel, anime characters and so on). Everything is drawn original.
- No real politicians or real people shown in a defamatory way. Fictional countries and leaders are fine.
- Violence is implied, never graphic, and content stays advertiser-friendly. No adult content.
- Long-form and Blender jobs taken off-platform (LinkedIn or direct): 50% upfront, 50% on delivery.
- Always confirm the script and voice before quoting a delivery date. Delivery time starts after approval.
- Platform fees: Fiverr keeps 20%, and Upwork's fee varies (about 0–15%). The prices here are list prices, so keep them.

LINKEDIN POST IDEAS

- Before/after post: a client's plain script → 3 finished frames → “this became a 60-second Short”.
- Results post: “This 3D Short hit 102% retention. Here's why it worked” (hook, escalation, loop).
- Behind-the-scenes carousel: script → storyboard frames → final video for a POV story.
- Offer post to faceless-channel owners: “I'll animate your next story as a stickman POV Short. A free sample frame is on me.”
